CAREER OBJECTIVE

Python Developer with hands-on experience in Django-based backend development, REST and GraphQL APIs, and database-driven web applications. Skilled in building declaration workflows, business validations, and data processing systems for production platforms. A strong communicator and collaborative problem solver who enjoys working within a team and is looking to grow within the software development industry.

SKILLS

Languages and Frameworks: Python, Django, REST APIs, GraphQL

Data and Analytics: Pandas, NumPy, Matplotlib, Machine Learning, Deep Learning, NLP

Database: PostgreSQL and MySQL

Web Development: WordPress, HTML, CSS, Bootstrap

Version Control: Git

EXPERIENCE

Synkcode (November 2025 to Present)

Python Developer

- Developed and maintained backend functionality for Dubai-based customs declaration platforms using Python, Django, and PostgreSQL, covering APIs, business logic, declaration workflows, and database operations.
- Built features for declaration pool management, team management, audit trail tracking, and advanced search, along with declaration ownership, access management, and integration of user and business information through external APIs.

Suffix E Solutions (April 2024 to November 2025)

Junior Software Engineer

- Developed web applications and designed websites, handling both frontend and backend tasks.
- Trained students in Python, Django, C#, ASP.NET (MVC), REST API, Bootstrap, HTML, and CSS.

PROJECTS

Declaration Management System, Dubai Customs

- Developed and maintained a Python and Django-based customs declaration platform for Dubai Customs, built to manage the creation and processing of import and export declarations, including declaration creation, amendment, document management, cargo details, importer and exporter information, and personal customer management.
- Built backend functionality using Python, Django, REST and GraphQL APIs, and database models to implement customs-specific business rules and validations, while also building dynamic frontend functionality using JavaScript, HTML, and AJAX, and debugging issues across the frontend, backend, database, and API integrations.

Customs Declaration Management (CDM), Dubai Customs

- Developed and maintained a Customs Declaration Management system for processing and managing customs declarations and their related workflows, working extensively on Python and Django backend development to implement business logic, APIs, database models, and workflow-based functionality using Python, Django, JavaScript, AJAX, REST APIs, and SQL.
- Developed features for the Declaration Pool, Team Management, Audit Trail, and Advanced Search, along with declaration ownership and access management.

Traffic Rule Violation Detection

- Built a real-time system to detect smoking, mobile usage, and driver drowsiness from a custom dataset, integrating YOLO for object detection and OpenCV for live video processing to improve traffic surveillance and road safety.

Digital Menu

- Developed a mobile-responsive, user-friendly commercial web application using ASP.NET and C#, handling the Products, Price, Orders, and other modules.

EDUCATION

M.Sc. Maths | Stella Maris College, Chennai | 2019 to 2021

B.Sc. Maths | Karunya Institute of Science and Technology, Coimbatore | 2016 to 2019

B.Ed | All Saints College of Education, Kaliyakkavilai | 2021 to 2023
